Profile

Interdisciplinary researcher and emerging UX practitioner with an MA in Digital Humanities from King's College London and a background in French, Film and Media Studies. I combine qualitative research, critical analysis, storytelling and digital design to explore how people interact with technology. Experienced in developing research-informed prototypes, analysing digital platforms and collaborating across disciplines. Particularly interested in creating accessible, inclusive and meaningful digital experiences.

Education

MA Digital Humanities | King's College London | 2026 | 2:1

BA French and Film & Media | Birkbeck, University of London | 2022-2025 | 2:1

Research, Projects & Experience

Full case studies available in portfolio.

Rewear | MA Dissertation

- Researched second-hand fashion experiences; developed a Figma prototype and Python-based recommendation system.

Rewritten | British Library

- Collaborated on a research-informed digital experience, contributing personas and prototyping.

Europeana Fashion | Digital Research

- Analysed 300 API records using Python; investigated metadata quality and multilingual accessibility.

Student Representative — Digital Humanities course and department | King's College London | 2025-2026

Represented student perspectives at course and departmental levels and contributed to communication between students and academic staff.
